

## MUSIC TASK

LI: To make music using objects you can find around your home.

TASK : Watch <https://www.bbc.co.uk/programmes/p00yygix>, a short video which shows how music can be made using everyday objects or even recycling!

Make a list of everyday objects found around your home that you could use for percussion purposes (musical objects played by striking with a hand or beater) and then have a go at exploring which different sounds they make.

Try changing your banging instrument (e.g. metal spoon/ wooden spoon/ lolly stick etc) and see if this affects the sound. Does it make a higher sound/ deeper sound? Is it a louder sound or quieter sound?

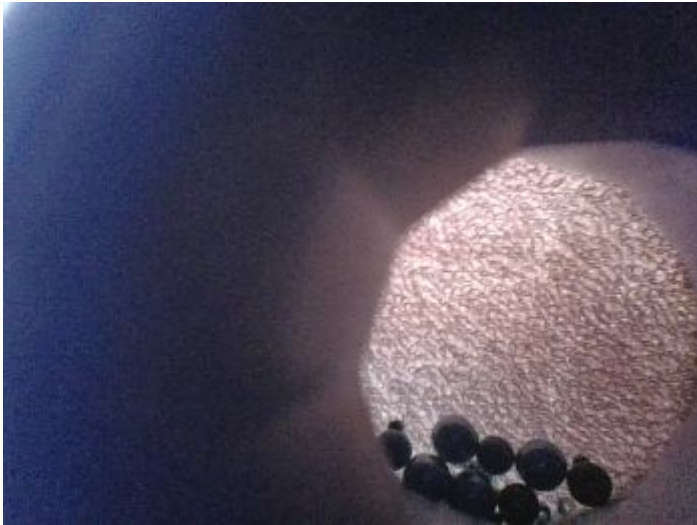

Challenge: Watch <https://www.bbc.co.uk/teach/bring-the-noise/found-sounds/z4rcbdm>  
Have a search around your home and, with permission from an adult, use these to make your own jar xylophone, big box bass, comb kazoo, hosepipe horn or any other instrument you can think of.

Please take photos of any creations you make.

It would be lovely to see how you can be creative with everyday objects.

i put beads into a container

This is inside.

I put the beads and some sequins into a balloon. Then I added water.

it sounded good.

I put a balloon over a cup and made a drum.

I made a rain shaker out of a plastic tube and sequins.

## Conclusion

In conclusion I think the rain shaker sounded the best because for some reason it reminded me of the outdoors and I miss seeing all my friends and family and going on long walks.
