# Zones Of Regulation Parent Workshop Pack

### The **ZONES** of Regulation<sup>™</sup> Glossary

**Self-regulation:** The ability to achieve the preferred state of alertness for the given situation. This includes regulating one's body's needs as well as one's emotions.

The Zones: A concept used to help students learn how to regulate. The Zones of Regulation creates a system to categorize how the body feels and emotions into four colored Zones with which the students can easily identify.

Blue Zone: Used to describe a low state of alertness. The Blue Zone is used to describe when one feels sad, tired, sick, or bored.

Green Zone: Used to describe a calm state of alertness. A person may be described as calm, happy, focused, or content when he or she is in the Green Zone. The student feels a strong sense of internal control when in the Green Zone.

Yellow Zone: Used to describe a heightened state of alertness. A person may be experiencing stress, frustration, anxiety, excitement, silliness, or fear when in the Yellow Zone. The student's energy is elevated yet he or she feels some sense of internal control in the Yellow Zone.

Red Zone: Used to describe an extremely heightened state of alertness. A person may be experiencing anger, rage, panic, extreme grief, terror, or elation when in the Red Zone and feels a loss of control.

Toolbox: A collection of calming and alerting strategies a student can pull from depending on the present need.

**Tools or strategies:** Used interchangeably to refer to a calming or alerting technique that aids the student in regulation.

Trigger: An irritant that causes a student to become less regulated and increases the likelihood of going into the Blue, Yellow, or Red Zone.

Stop, Opt, and Go: A concept used to aid students in controlling impulses and problem solving better solutions. This phrase is paired with a stoplight to provide additional cues for students.

Expected behaviors<sup>1</sup>: Behaviors that give people around you okay thoughts about you.

Unexpected behaviors¹: Behaviors that give people confused thoughts about you.

**Doer:** The person or persons doing the expected or unexpected behavior in a situation.

What is the size of the problem? and Is this a Big or Little Problem? Questions posed to help students measure the size of the problem they are experiencing (Big Problem, Medium Problem, or Little Problem).

Big Problems: Problems that many people share and that have no easy, quick, or pleasant solution.

**Medium Problems:** Problems some people share that are able to be resolved in an hour to a couple of days.

Little Problems: Problems that only affect one to two people and can be ignored or solved in a matter of minutes.

Inner critic: Used to describe negative, self-defeating thoughts.

Inner coach: Used to describe positive thoughts.

Superflex thinking<sup>2</sup>: A flexible thinking pattern in which a person is able to consider different points of view or ways to do something.

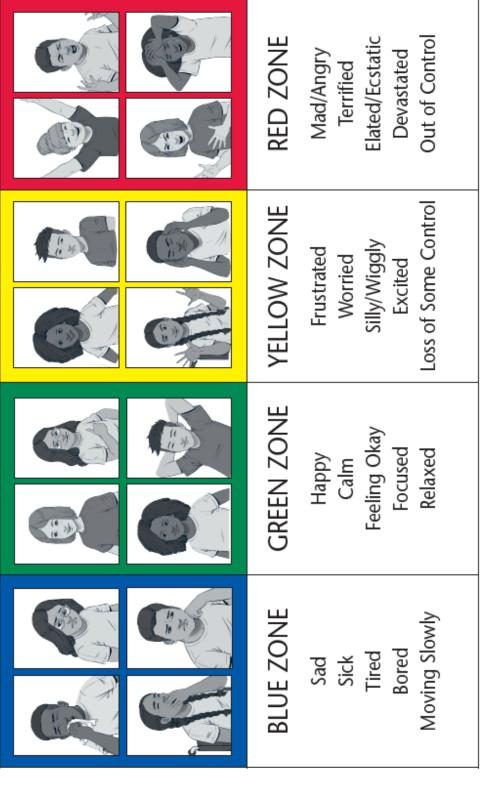

Rock Brain thinking<sup>2</sup>: A rigid thinking pattern in which a person gets stuck on an idea and has difficulty considering other options or ways to do something.

### Which **ZONE** Would I Be In?

All of the Zone colors are okay. There are times when you will be in different Zones. Think about times that you expect you would be in the Blue, Green, Yellow, or Red Zone.

### I experience all the Zones!

Times I may be in the BLUE ZONE	Times I may be in the GREEN ZONE
Times I may be in the YELLOW ZONE	Times I may be in the RED ZONE
